Hey guys, resurrecting an old thread here. Sorry! Just did an oil change. My 99 TJ 2.5 only took 2.5 quarts. I let the old oil drain until very few drops came out. Placed a new oil filter and filed the crank case. I did not want to over fill the jeep, so I stopped at 2.5 quarts. Ran the car for a few minutes and checked the dip stick.

I have a 1988 2.5l jeep, and oil keeps leaking from the oil fill cap. I have installed a new cap, and it still leaks past. I have changed the PVC valve, and cleaned out the vent at the rear of the cover, and still oil leaks past. I have read that there are baffles in the valve cover that should be checked, however I'm not sure what
