But, a business analyst focuses on the “what”. They try to understand what needs to be done, and the “why” behind it. One of the hardest things about moving from a developer to a business analyst is changing your thinking from thinking about “how” something can be done to “what” needs to be done. This takes time and experience.

A Guide to the Business Analysis Body of Knowledge(R) (BABOK(R) Guide) is the only globally recognized standard of practice for business analysis. Developed through a rigorous consensus-driven standards process, the BABOK(R) Guide incorporates the collective wisdom and experience of experts in the field from around the world.

Guide to Business Analysis Body of Knowledge (Babok Guide ...

A business analyst should define the ultimate vision of what the project should look like early on, effectively limiting the scope of development. A precisely defined project scope will help the team prioritize features in order to deliver a minimum viable product as early as possible instead of spending time on secondary and nice-to-have features.
