Virtual Reality Filmmaking:

Techniques & Best Practices ...
3D computer graphics, or three-dimensional computer graphics (in contrast to 2D computer graphics), are graphics that use a three-dimensional representation of geometric data (often Cartesian) that is stored in the computer for the purposes of performing calculations and rendering 2D images. The resulting images may be stored for viewing later (possibly as an animation) or displayed in real time.

3D computer graphics - Wikipedia
The earliest confirmed 3D film shown to
an out-of-house audience was The Power
of Love, which premiered at the
Ambassador Hotel Theater in Los
Angeles on 27 September 1922. The
camera rig was a product of the film's
producer, Harry K. Fairall, and
cinematographer Robert F. Elder. It was
filmed dual-strip in black and white, and
single strip color anaglyphic release
prints were produced using a ...
