I've rebuilt a 4AGE smallport, got it installed and running. Now I want to get the most out of my after market camshafts. But I'm just not sure how to go about timing them precisely. From what I've read, I need a timing disc (bolted to the crank shaft) with a pointer (bit of wire?) to find TDC using a dail guage down cylinder #1. Now at TDC the intake and exhaust lobes over #1 should be ...

Modification of an engine's valve timing is best approached with a degree of caution. For otherwise stock engines, the mildest cams should perform well. Performance will improve with improved induction, i.e., carburetion or a more efficient injection (ported/polished throttle body) and exhaust system (headers).

4AGE to 7AGE conversion how-to by H7ERO. The project started when I wanted a way to find more torque from the 4age engine. So when drifting through transitions and reducing-radius bends off power, it will be easier to continue the drift when you come back on power. 4AGE is very peaky, when you drop out of the power it is almost impossible to recontinue drift unless you have time to rev and ...
