The Framework for
Design Excellence Of
Hospitals And
Healthcare
Facilities
represents the defining
principles of good
design in the 21 st
century. Comprised of
10 principles and
accompanied by
searching questions,
the Framework seeks
to inform progress
toward a zero-carbon,
equitable, resilient, and
healthy built
environment. These
are to be thoughtfully
considered by designer

a volume for hospitals,
a new volume for
outpatient facilities,
and the volume for
residential health, care,
and support facilities.

Each provides basic
information on
planning, design,
construction, and
commissioning as well
as minimum design
requirements for
particular facility types.
