Please be advised that the API recommends use of current editions of all API standards. API RP 11PGT, First Edition, May 1, 1992, Paragraph 2.3.2 requires that couplings meet API 671. API 671, Section 2.6, refers to balance tests. There are two kinds of balance test methods, low speed balance and high speed balance. We understand that API 671 requires only a low speed balance and does not require a high speed balance.
