Applied research is an umbrella term that includes various kinds of systematic, empirical research that aims to solve particular problems. In the broad field of education, these problems are those that would arise not only in all aspects of teaching and learning across the lifespan but also from organizational and policy dimensions related to efforts to educate.

Applied Research - SAGE Research Methods

Applied research is a little different than the rest of the methods described previously, which are all considered basic research. Applied research is the process of quantifying how well we applied the knowledge we have learned from basic science to solving some problem. Here we use similar techniques to basic research, but the goals of the research are different.
