The EGR has developed a fault and I dont want to be going down the route of constantly spending £100 every few months changing it. That is what happened with my old Astra G, 5 EGR Valves later I found out about the blanking plate and Software Update and never had a problem after that.

I have a Opel Astra H -2007 with about 120000 km:s on the clock. A while ago the -engine fault lamp came on ant the P0171 code was set in the ECU. I started (perhaps in the wrong order) to replace the EGR valve which offcourse not cleared the fault. The next step I assume is to take the inlet manifold apart and clean up the EGR channels.
