### Carburetor For 17.5 hp Briggs & Stratton 310000 Series Engine

An overheating Briggs and Stratton engine can have a number of causes. The engine may be dirty and require the removal of dirt and debris during a thorough cleaning. The engine may also be low on oil or need the air-fuel mixture adjusted upward. A leaky gasket may also require replacement to prevent further overheating issues.

### What Are Some Common Problems With Briggs & Stratton Engines?

Fuel, fire and air are the main components for operation of any combustion engine. When troubleshooting a Briggs & Stratton engine, the same holds true. Fuel must reach the combustion chamber for the engine to fire. Fire is created by the spark of the spark plug which is generated by a magnet on the flywheel.
