joinery with these plans from Nick Engler. This versatile shop built tool features a sliding table that moves in four directions and an

### **Build Your Own Router Tables - bitofnews.com**

Building a DIY Router Table Top. A good router needs a sturdy top, which should be anywhere from 1-1/8" to 1-1/2" thick. The thicker your router tabletop, the less likely it is to sag. This is important for precise joinery work like lock miters or dovetails because errors of even 1/64" can cause big problems.
