Chameleon Chameleon

Some chameleon species are able to change their skin colouration. Different chameleon species are able to vary their colouration and pattern through combinations of pink, blue, red, orange, green, black, brown, light blue, yellow, turquoise, and purple. Chameleon skin has a superficial layer which contains pigments, and under the layer are cells with guanine crystals.

Chameleon | Definition of Chameleon by Merriam-Webster

Panther chameleons have very long tongues (sometimes longer than their own body length) which they are capable of rapidly extending out of the mouth. The tongue extends at around 26 body lengths per second. The tongue hits the prey in about 0.0030 sec. The tongue of the chameleon is a complex arrangement of bone, muscle and sinew.

Panther chameleon - Wikipedia

Chameleon, (family Chamaeleonidae), any of a group of primarily arboreal (tree-dwelling) Old World lizards best known for their ability to change body colour. Other characteristics of chameleons include zygodactylous feet (with toes fused into opposed bundles of two and three), acrodont dentition (with the
