Children have a special fascination with the workings of the digestive system: They relish crunching a potato chip, delight in making "mustaches" with milk, and giggle when their stomach "growls."

## **Chapter 14 The Digestive System - Chapter 14 The Digestive ...**

No digestion takes place in the esophagus. Next comes the stomach, which is the third part of the digestive system. In the stomach, digestive acids, such as hydrochloric acid, help further break down food and kill accidentally ingested bacteria. Some of these acids come from the liver and the pancreas.

## **Chapter 14 - The Digestive System - Biology 111.102 with ...**

The digestive system ingests and  
digests food, absorbs released nutrients,  
and excretes food components that are  
indigestible. The six activities involved in  
this process are ingestion, motility,  
mechanical digestion, chemical  
digestion, absorption, and defecation.  
These processes are regulated by neural  
and hormonal mechanisms.
