Ratio in the format $a:b:c$ is called continued ratio. You can convert two ratios into a continued ratio when they have one quantity in common. Here is an example: Example 1: Given that $a:b = 3:5$ and $b:c = 4:3$. There is a common quantity b in the two ratios. The key is to make this quantity the same in the ratio. Here LCM 20 can serve the ...
