Ending climate change requires the end of capitalism. Have ...

Confronting climate change is now understood as a problem of 'decarbonising' the global economy: ending our dependence on carbon-based fossil fuels. This book explores whether such a transformation is underway, how it might be accelerated, and the complex politics of this process. Given the dominance of global capitalism and free-market ideologies, decarbonisation is dependent on creating ...

Climate Capitalism: Global Warming and the Transformation ...

A shocking statement was made by a United Nations official Christiana Figueres at a news conference in Brussels. Figueres admitted that the Global Warming conspiracy set by the U.N.'s Framework Convention on Climate Change, of which she is the executive secretary, has a goal not of environmental activists to save the world from ecological calamity, but to destroy capitalism.
