This style of camera is different than compact cameras or the camera in your smartphone in several ways. For one thing, the larger light sensor in a DSLR lets in more light to provide a clearer, more detailed image, giving you as the photographer more control, and greater creative flexibility — even in low light situations when the larger sensor helps minimize distortion.

The advent of digital cameras has completely changed the perception of photography. In earlier times, photographers used to get a limited number of shots from film, but now they can take as many photos as they want. However, digital cameras do not provide the facility to obtain the prints automatically. This is where digital photo frames step in.
