Contaminant Hydrogeology

The Journal of Contaminant Hydrology is an international journal publishing scientific articles contributing to a broad understanding of contamination of water resources. Emphasis is placed on investigations of the physical, chemical, and biological processes influencing the behaviour and fate of organic and inorganic contaminants in the aqueous environment including ecological impacts.

I bought this as a "required" text for a groundwater hydrogeology (contaminant transport) class. The class is highly dependent on partial differential equations, incomplete integrations, Bessel functions, leaky aquifer functions, etc. It's VERY numerical in nature and it involves a LOT of higher level calculus and differential equations.
