Full brake air pressure on Daf CF but gauges read zero,buzzer remains 'on'and dash reads 'low brake air pressure' and ABS fault.-- fitted sensor unit at air dryer but no change. Help would be great check the air pressure switch at the tank supply line at the foot (treadle) valve if that switch is not operational then it may be where the system is not getting a full pressure report

SOLVED: How fix DAF CF configuration error problem - Fixya

We highly recommend you to delete all DTC (Diagnostic Trouble Codes) errors from the OBD (On-Board Diagnostics) system. The best option is to use DAF VCI 560 diagnostic scanner. Also, it is recommended to check the OBD system after installation of the AdBlue Emulator module because there might be errors related to installation procedures.

AdBlue Emulator EURO 6 NOx installation manual for DAF trucks

Below you will find a list of the most commonly used codes. Our software contains all of the 11 000 codes. Don't hesitate to download it. It is free and, using an ELM327 or ELM323 interface, can be used to read the fault codes. For more details, go to our EOBD-Facile car diagnostic software page. Select the family of the DTC (OBD codes)
