4 Decision Making in Small Animal Oncology Nomenclature The nomenclature of tumors is based upon two concepts: † First, tumors can be considered as either benign or malignant. For simplicity, the pathological differences between benign and malignant are outlined in Table 1.1.

Decision Making in Small Animal Oncology

Animals make decisions about risks and rewards based on their environmental and social context. That context is changing as humans are altering natural systems at an unprecedented rate. We are causing habitat degradation, fragmentation, and loss, and are directly impacting species populations. These changes influence animal decision making behaviors such as mate searching, foraging, avoiding ...

Decision Making In Small Animal Oncology [EPUB]

Our results demonstrate the role of shared decision-making in maintaining the balance of influence within animal societies.

INTRODUCTION Across the animal kingdom, the power held by dominant individuals mirrors their ability to monopolize resources (1 , 2), but not necessarily their influence on group decisions (3).

Shared decision-making allows subordinates to lead when ...

This approach can be applied to decision making in small animal veterinary medicine.¹¹ Establishing these thresholds may provide insight into rationale for clinical decisions made by small animal veterinarians. Clinical decision thresholds also provide the potential establishment of clinical decision rules, which are significant in human medicine yet remain to be investigated in veterinary ...
