But then you have to consider the typically large upcharge for a diesel engine option. Compare a 320-hp Yanmar Diesel at \$38,245 and a Crusader 320-hp gasoline engine at \$11,587. That's a \$26,658 difference, or \$53,316 in a twin-engine boat. That difference that could buy you a lot of gasoline!

## **Engines - Yanmar**

Small Boats and Diesel Engines: The question of whether gas or diesel is a better power choice dissolves for boats of a certain size or weight. I draw this line somewhat arbitrarily at around 16,000 lbs or 35 feet. I say "arbitrarily" because a lot of other factors come into play such as hull efficiency and windage in superstructures, but ...

## **Marine Engines : Power Options - Gas Versus Diesel**

When you're buying a new boat, or repowering an existing boat, you may need to decide whether gasoline or diesel is right for your needs. If you're not as familiar with diesels as you are with gas engines, and still think of diesels as smoke-belchers, just be aware that there's been a lot going on over the past several years when it comes to diesel engine technology for marine applications.

world's prominent boating markets is a deep source of honor for all of us.

### **Home - Yanmar**

Boats are used less frequently and in a sailboat the engine is used even less as the primary method of propulsion are the sails and the wind. It is not uncommon to find 30 year old engines in very good shape. The use of a marine engine is measured in hours and a diesel engine can easily go 10,000 hours before requiring a rebuild.
