Document Management System - Expansion

Inadequate functionality: Features are missing from the document management system. Xtendis, Expansion's standard document management system, solves all these problems. Expansion can transfer documents and metadata from your existing DMS package to Xtendis so you can move on directly with a modern DMS. Profitable switching

Replace current DMS - Expansion

A document management system (DMS) is a system used to receive, track, manage and store documents and reduce paper. Most are capable of keeping a record of the various versions created and modified by different users (history tracking). In the case of the management of digital documents such systems are based on computer programs. The term has some overlap with the concepts of content ...

Document management system - Wikipedia

Document Management Systems. A Document Management System is primarily designed to digitize, archive, and manage documents. A DMS is invaluable in keeping all users up to date with versions or ensuring that one user doesn't accidentally overwrite the work of another. However, these systems are designed to only handle documents.

Document Management Systems vs. Enterprise Content Management
