Earth Science Regents. The Circumference of Earth. Copyright 2006 by Steve Kluge. Around 200 B.C., a mathematician living in Egypt named Eratosthenes used a clever method involving observation of the sun in two nearby locations to determine the actual circumference of the earth. In this lab, you will use some modern technology to collect data that you will use to determine the size of the earth without leaving the campus!

Earth Science Regents - Steve Kluge

Unavailable. per item. In this lab activity, students will work with a partner to model the Moons revolution around the Earth and the phases observed on Earth based on the relative positions of the Earth, Moon, and Sun. (This lab is intended to be completed by students who have access to a "Moon Ball", which is essentially just a softball that has been bisected by painting it black.

Lab: Phases of the Moon - Regents Earth Science

To measure the incredibly large distances in space, astronomers use either astronomical units (the average distance from the Earth to the Sun, approximately 93 million miles) or light years (the distance a beam of light will travel in one year, approximately 5.8 trillion miles).
