The eccentric phase does not need to be emphasized for the purpose of enhancing size and strength. Don't get me wrong, the eccentric phase is just as important — maybe even more important — as the concentric phase, but the stimulus it receives with traditional, fast contractions takes care of all your training needs.

Tourism industry performance is conditioned by a number of key national economic variables over which the industry itself can exert little or no control. These include trends in national price and cost competitiveness, rates of taxation levied on tourist spending, the availability of access transport, the quality of national infrastructure and the state of the physical environment.

Eccentric isometrics (EI's) are by no means a new training technique. Many powerlifters, Olympic lifters, bodybuilders, and strength coaches have been advocating something similar for years. In fact if you make it a habit of combing the web for quality training information you've probably seen many an author promoting the idea of performing something similar to eccentric isometrics.
