During network analysis, we have to transform either delta to star or star to delta for simplifying the network. Let us consider one three terminal network formed by three impedances Z_a , Z_b , and Z_c connected in star. Consider another three terminal network formed by three impedances Z_{ab} , Z_{bc} , and Z_{ca} . If these two networks are equivalent to each other then the relationship between the impedances of star and delta would be as follows.
