Education: Creating Profiles In
Education

Disability studies is an academic discipline that examines the meaning, nature, and consequences of disability. Initially, the field focused on the division between "impairment" and "disability", where impairment was an impairment of an individual's mind or body, while disability was considered a social construct. This premise gave rise to two distinct models of disability: the social and ...

Disability studies - Wikipedia

It suggests how a capability perspective provides new and fundamental insights into the conceptualization of impairment and disability, and in doing this, resolves the tension between natural and social causal factors evident in current discussions of disability and education.

A capability perspective on impairment, disability and ...
