A batch file is a script file in DOS, OS/2 and Microsoft Windows. It consists of a series of commands to be executed by the command-line interpreter, stored in a plain text file. A batch file may contain any command the interpreter accepts interactively and use constructs that enable conditional branching and looping within the batch file, such as IF, FOR, and GOTO labels.

Batch file - Wikipedia

Batch file programming is a way of making a computer do things simply by creating, yes, you guessed it, a batch file. It's a way of doing things you might ordinarily do in the command prompt, but automates some tasks, which means you don't have to write so much code.
