Essentially, consumer behaviour places a twofold environmental burden on the ecosystem via pollution and also via the destruction of non-renewable natural resources (Abeliotis, Koniari, & Sardianou, 2010). Hence, encouraging more pro-environmental behaviour is imperative for environmental sustainability. This is a challenge that

**Consumer Behaviour and
Environmental Sustainability**

Traditionally, environmental psychology has focused on the interrelationship between environments and human behaviour (De Young, 1999; Garling & Golledge, 1993). According to Gifford (1997) individuals change the environment and their behaviour and experiences are changed by the environment.
