Fours Worksheets - Teacher Worksheets
Since all the answers are integers, I started the search by generating a list of integers that could be build with one or two 4s. These became useful building blocks in finding the larger numbers. Since it is possible to create an infinite number of integers from even a single four (for example, 4! = 24. 4!! = 6204484017332394393600000, and so ...

okay so i have this math worksheet thats due in a few days and i'm almost done but i have a few problems that i absolutely CANNOT get. basicly, i have to come up with these equations using only the number four four times. for example: [(4!+4)/4)]+4! is equal to 31 i cannot use decimals, combine numbers (like putting four and four together to make 44) or negative, however the equation may ...

math help! (four fours)? | Yahoo Answers
20 = 4 + (4 / 4) * 4 From the way I see it (must use four 4s, only using x, +, -, /), they're the only ones I see to be possible after spending a few minutes on it. This is because you can only get 0, 1, 8 or 16 with two numbers, and then you can only add, subtract, multiply or divide that by 0, 1, 8 or 16.
