Air conditioner - Free Pdf Manuals Download | ManualsLib

When connecting the pipes to the unit during an air conditioning installation, put a tiny drop of oil on all of the facings first. Next, attach the pipes to the brass cones and tighten with two wrenches. Be careful not to overtighten. The copper pipes need to be covered with foam insulation and you should put foam over all the connecting parts. Make sure no refrigerant is leaking from any of the connectors when you start the unit.
