That evidence-based medicine (EBM) in its current incarnation relegates basic science considerations to the lowest rung of evidence on its hierarchy of clinical evidence. Indeed, I spent quite some time talking about just that in my talk to the National Capital Area Skeptics a month and a half ago.

A very special issue of Medical Acupuncture - Science ...

Richard Horton argues that combination prevention and global health collaboration are required to address the COVID-19 pandemic.¹ We agree and suggest this should incorporate further measures. Thinking closely in terms of medical solutions could create false public expectations of a return to normal, and risks closing out non-health interventions that could lead to substantial improvements.
