Grandmother Fish: a child's first book of Evolution

It makes it seem like a very quick process, like grandma fish just gave birth to a reptile. She didn't understand any part of the story the way it was written. She did like the actions - wiggling like a fish, hooting like an ape - but the idea that we share some of those characteristics with our ancient relatives was lost on her.

Now while I without a doubt do appreciate how simple and very much age appropriate Jonathan Tweet's main textual body is presented in his Grandmother Fish (as the book is marketed as a child's first book about evolution, and indeed from word choices, song-like repetitiveness to the large size of the printed words themselves, Grandmother Fish is clearly geared towards younger children, towards three to five or six year olds) I for one have sadly and unfortunately also found the very basic and bar

Grandmother Fish by Jonathan Tweet - Goodreads

Grandmother Fish is a child's first book of evolution. The book engages a young child's imagination with sounds and motions that imitate animals, in particular our direct ancestors. It lets children see for themselves that we are related in form and function to the nonhuman animals that came before us.
