The MSL2024 Tape Libraries now include the ability to be configured as a partitioned library. MSL Libraries may be configured with up to one partition per drive; two partitions if two drives are installed. Partitioning allows each partitioned library to be presented to the host as an independent library, separate from other partitions in the library.

The back of my library BL542A is not in the manual. I think that "drive a, port A" is the FC interface, and "drive a, port B" is the other rj45 port. Using the web, the library shows "port B not present", using the frontal display, I can configure port B, or it seems, because the parameters wont save.
