Key points about study skills: You will develop your own personal approach to study and learning in a way that meets your own individual needs. As you develop your study skills you will discover what works for you, and what doesn't. Study skills are not subject specific - they are generic and can be used when studying any area. You will, of course, need to understand the concepts, theories and ideas surrounding your specific subject area.

Study Skills. Reading information aloud to yourself improves memory. Confirming what many of us have learned through practical experience, a study comparing different strategies of reading or listening has found that you are more likely to remember something if you read it out loud to yourself. In the study, 75 undergraduate students first spent around 15 minutes being recorded as they read aloud 160 common words.
