First, identify the problem you've encountered with your engine, then rule out each potential cause. Remember to follow all safety precautions before starting any work on your engine. If troubles persist after checking the possible causes listed or you are unable to identify the problem, call KOHLER Engines Customer Service at 1-800-544-2444 or contact your local KOHLER dealer.

Troubleshooting | KOHLER

Take the fuel line off where it connects to the carburetor. Crank the engine over and see if fuel squirts out of the hose and into the container. If it does then the fuel is getting to the carburetor. If you confirm that you have fuel there then the problem is likely one of two things.

27 HP Kohler Engine it is not getting gas to the ...

You think you're doing the engine a favor by staying on top of the maintenance stuff, (and even more so by adding a larger filter that looks better), but you often wind up causing problems when the fuel pump can't suck the gas through the element Probably the most common Kohler fuel filter number in use on these engines is a part # 24-050-02.

kohler engine acts like its starving for gas ...

One of the first symptoms of a problem with the fuel pump is a loud whining sound. An old or worn fuel pump may produce a noticeably loud whine or howl while running. Most fuel pumps will produce a quiet hum during their normal operation, however, an excessively loud whine coming from the fuel tank is usually a sign of a problem.
