### Legitimizing ESS - GBV

"Big Science" is a broad term that can be associated with research projects as different as the Manhattan Project, the Hubble Telescope and the CERN laboratory in Geneva. While the research produced by these projects is vastly different, they have in common the fact that they all involve huge budgets, big facilities, complex instrumentation, years of planning, and large

Legitimizing ESS: Big Science as a Collaboration Across Big Science is a broad epithet that can be associated with research projects that involve huge budgets, big facilities, complex instrumentation, years of planning, and large multidisciplinary teams of researchers.

### The Disunity of Science: Boundaries, Contexts, and Power ...

Although the nuclear era and the Cold War superpower competition have long since passed, governments are still investing in Big Science, although these large facilities are nowadays mostly geared towards areas of use closer to utility. Investments in Big Science are also motivated not only by promises of scientific breakthroughs but also by expectations (and demands) of measurable impact, and ...
