A Theory of Light and Shade - Art Instruction Blog

Color theory is a body of principles which provide guidance on the relationship between colors and the physiological impacts of certain color combinations. Color theory is one of the most fundamental areas of painting. The importance of understanding color theory far exceeds simply knowing how to mix colors together (for example, knowing that yellow and blue make green).

Light For Visual Artists Understanding Amp Using In Art ...

Values are the different shades of gray between white and black. Artists use values to translate the light and shadows they see into shading, thus creating the illusion of a third dimension.. Hatching and crosshatching are simple and fun techniques for drawing shading. . A full range of values is the basic ingredient for shading. When you can draw lots of different values, you can begin to add ...
