### 5 Camera Settings That All Macro Photographers Should Know

Recommendation: Optically this is one of the very best lenses you can buy today.It is a manual lens which some (like the authors of this blog) see as a bonus but many will see an issue in this. Since it only focuses down to 1:2 we would recommend it more as a general purpose lens which can also work well as a macro lens for some applications than as a dedicated macro lens.

### Guide to Macro Lenses for the Sony a7 ... - Manual Lenses

Put a macro lens on your camera and set it to manual focus at your intended magnification. Pick the correct exposure settings so that you capture the enough light. If the flash is your main source of light, and you're shooting at 1:1 magnification, it is a good idea to use the fastest shutter speed that still syncs with your flash (typically 1/200 or 1/250 second).
