The Low Signature Armored CAB (LSAC) adds ballistic and mine blast protection for the crew in a purpose-built cab that can be interchanged with a standard FMTV cab in eight hours. The LSAC cab can provide the crew protection from assault rifle rounds, land mines, and artillery fragments and still retain C-130 transportability on the some models, and can be installed on any FMTV vehicle in the ...

All surplus armor is to be scrapped. The government sold 3 million pounds of new LSAC cabs a few years back and all were scrapped. One can buy a cab from Oshkosh for \$25K but you will likely need another \$100K in parts to get it to work, as there are substantial differences in the truck between the armored cabs and soft cabs.

Based on experiences gained in Iraq, the need for more heavily armored vehicles was realized. The LSAC was designed to fill that need and does so very well. It can be either fully integrated on the production line or interchanged with a standard cab in approx. 8 hrs. LSAC Cabs have been applied to existing soft cab vehicles and new build vehicles.

### **Caiman Mrap Technical Manual**

The LSAC replaced the standard FMTV cab (with which it shares internals) in a remove and replace operation. To meet the US Army's current Long Term Armor Strategy (LTAS) for armored cabs, BAE Systems developed the LTAS cab for the FMTV. BAE Systems states that it produced over 9,000 LTAS cabs for the FMTV A1P2 variant.
