Math notation tools let you write or type out the special symbols and numbers used for math equations. For example, the symbols in $x = -b \pm \sqrt{b^2 - 4ac}/2a$. Writing out these equations by hand can be challenging for people who have trouble writing numbers and symbols.

Assistive Technology for Math - Understood

Protractor. The simple protractor is an ancient device. As an instrument used to construct and measure plane angles, the simple protractor looks like a semicircular disk marked with degrees, beginning with 0° to 180°. The first complex protractor was created for plotting the position of a boat on navigational charts.

A Timeline History of Mathematics - ThoughtCo

A mathematical instrument is a tool or device used in the study or practice of mathematics. In geometry, construction of various proofs was done using only a compass and straightedge; arguments in these proofs relied only on idealized properties of these instruments and literal construction was regarded as only an approximation.
