Does anyone have the solutions manual for "Mechanical Vibrations" by S.S. Rao, 3th or 4th Edition? I am really having trouble with these problems, especially chapter 9. I just need to know how to do problems like them for tests.

vibration and stability of the system are discussed. Chapter 6 presents the vibration analysis of multidegree of freedom systems. Matrix methods of analysis are used for the presentation of the theory. The modal analysis procedure is described for the solution of forced vibration problems.
