ABOUT. For many Americans, the mention of the word agriculture sends the imagination to a corn field with a tractor. But the agricultural mechanization and business major at Clemson turns that idea upside down and leads students into the innovative and international world of agriculture and agribusiness, combining sciences and related technologies with a background in business management.

Our world is always changing. Just look at how industry has evolved: from the first industrial revolution in the late 18th century with steam power and mechanisation, the second starting in the late 19th century with electricity and leading to assembly lines, and the third starting in the mid-20th century, powered by new information technology and automation.

The impact of Industry 4.0 on HR professionals - SEAC

In doing so, we've interacted closely with over hundreds of sanitary workers and gained an understanding of the overall ecosystem. It's from this understanding and conviction that we, have incorporated a Section 8, social organisation under the name and style of "KAM FOUNDATION" to bring about a behavioural change in the lives of this marginalised group.
