I took Prof. Appel's course in the spring and the book was a great companion for the lectures. It's quite comprehensive and building the compiler is a lot of fun. I also have the the sister-book, Modern Compiler Implementation in C. So if you're choosing between the C, Java and ML versions, I strongly recommend using ML.

## **Compiler Books**

Bytecode compilers for Java, Python are also examples of this category. Just-in-time compilers (JIT compiler) defer compilation until runtime. JIT compilers exist for many modern languages including Python, JavaScript, Smalltalk, Java, Microsoft .NET's Common Intermediate Language (CIL) and others. A JIT compiler
