Molarity Labs and Worksheets by Jen Siler's Classroom | TpT

We were supposed to find out who killed a victim based off of who had access to the murder weapon. We found the molarity of the weapon and what the weapon was made of from a reaction that we preformed. The murderer was Mr. Green and it was proven because he had access to silver nitrate of the same molarity, proving him the murderer.

Rachel's Chemistry Adventures: Murder Mystery Lab

In this lab, we used our knowledge of molarity to determine who killed Miss Scarlet and with what. We were told that the substance that killed her was either silver nitrate or potassium iodide.
