Mufflers For Small Gas Engines - Indivisiblesomerville.org

The extent to which the invention attains its objectives is evident from the fact that a muffler embodying the principles of this invention, intended for 8- through 16- hp engines, can have a largest dimension (length) of 10 inches and can bring exhaust noise of a 10- hp engine on which it is installed to a "direct out" level of 68 dbA at 50 ft., tested at wide-open throttle, while power ...

Low noise level muffler for small engines - Briggs ...

1) Exhaust gas temperatures can reach very high levels. A diesel engine can easily produce an exhaust gas temperature of 600°C(1100°F) or more. 2) The speed with which sound can be transmitted through air is dependent on the temperature of the air. This applies to exhaust gases as well. The higher the exhaust temperature,

EXHAUST SYSTEMS - Defender

CO is a dangerous poison. Operating gasoline-powered engines and tools indoors is RISKY BUSINESS. Recommendations. It is not widely known that small gasoline-powered engines and tools present a serious health hazard. They produce high concentrations of CO—a poisonous gas that can cause illness, permanent neurological damage, and death.
