How to create and execute Stored Procedure in MySQL ...

OCRA (OCcupational Repetitive Action) is currently one of the most widespread procedures for assessing biomechanical risks related to upper limb repetitive movements. Frequency factor of the technical actions represents one of the OCRA elements. Actually, the frequency factor computation is based on workcycle video analysis, which is time-consuming and may lead to up to 30% of intra-operator ...

Sensors | Free Full-Text | On the OCRA Measurement ...

The discussion in this paper focuses on the construction of the bank's performance profile using a new performance measurement method called operational competitiveness rating analysis (OCRA). The paper also includes comparisons of OCRA and data envelopment analysis (DEA) ratings and profit scores to show the validity support among the three approaches as well as underscore their differences.

Measurement of the performance of an investment bank using ...

In computer security, challenge–response authentication is a family of protocols in which one party presents a question ("challenge") and another party must provide a valid answer ("response") to be authenticated.. The simplest example of a challenge–response protocol is password authentication, where the challenge is asking for the password and the valid response is the correct password.
