The Piper PA-31 Navajo is a family of cabin-class, twin-engine aircraft designed and built by Piper Aircraft for the general aviation market, most using Lycoming engines. It was also license-built in a number of Latin American countries. Targeted at small-scale cargo and feeder liner operations and the corporate market, the aircraft was a success.

General Maintenance Manual | Piper PA31-350 Type Club

The P-Navajo was the heaviest airplane Piper had at the time, weighing in at a hefty 7800 pounds gross. To lift that much weight, Piper employed two of the largest, most complex, horizontally-opposed aircraft engines ever built: the six-cylinder, turbocharged, geared, Lycoming TIGO-541-E1A models—rated at 425 hp at 45 inches of manifold pressure and 2133 propeller rpm (this equals 3500 ...
