The audit requirements include the review of the process, products, and the system itself. Documenting is a critical element in the audit process. The documentation of procedures, monitoring, internal audit procedures, corrective actions, and preventive measures act as proof that the internal controls are working efficiently. 2. ISO/IEC 27001:2013

Manufacturing Company Internal Audit Checklist

Today, we talk about auditing plant, property, and equipment (or capital assets if you work with governments).Plant, property, and equipment is often the largest item on a balance sheet. But the risk is often low to moderate. After all, it's difficult to steal land or a building. And the accounting is usually not difficult. So the dollar amount can be high but the risk low.In this post, we ...
