08 predator 50 bogging on throttle | Polaris ATV Forum

no until you get an aftermarket exhaust the 150 to 155 range is rich enough. once you get the other jetting circuits right on then try a new plug and do a full throttle run and check out the plug color then you will know for sure. dark brown to black is too rich grey or white is too lean and golden brown is just right. i mostly read the rim of the metal plug around the eletrode and porcelan.
