The first step to solving this problem is to utilize Kirchoff's rules to write a set of equations to find the unknowns. Below two loops are diagrammed, and we assign 3 currents to the circuit. The first and second pass up through batteries 1 and 2 respectively, and the third current passes down through .

AP Physics - Electric Circuits, DC Circuits are classified by the type of path that the electricity follows as it goes around the circuit. There are two types of circuits - series circuits and parallel circuits. In a series circuit there is only one path. All the circuit components are in line, connected by the conductor, so that all the
