Chapter 9 Adsorption

Adsorption processes taking place on the cell membranes promote many vital chemical reactions and also cause changes in surface tension and cell consistency. 4. Drugs and poisons which are adsorbed on cell surfaces exert their effects from that location. Selective adsorption may be related to specific action.

Adsorption: Characteristics, Principles and Importance

Adsorption from solution generally follows the same principles as laid down for adsorption of gases by solids and is subject to the same factors. Thus, Some adsorbents specifically adsorb certain solutes more effectively than others. An increase of temperature decreases the extent of adsorption.
