Levorsen's Geology of Petroleum is a classic; a model. For the older set of geologists, it should bring warm memories of words, phrases, maps and descriptions revisited. For the younger set of geologists it should provide a sense of petroleum geology as it was perceived in the 1950s and 1960s, sound, respectable and exciting.

Geology of Petroleum, Second Edition

The second major class of oil trap in petroleum geology is the stratigraphic trap. It is related to sediment deposition or erosion and is bounded on one or more sides by zones of low permeability. Because tectonics ultimately controls deposition and erosion; however, few stratigraphic traps are completely without structural influence.
